

# Aluminium in highest precision

---

Non-ferrous metals, specializing in aluminium

# Aluminium in highest precision

## *Precision from prototype to mass production*

We, as a technology leader in the area of high-precision mass production, employ the most modern, state-of-the-art machines to meet your needs. A special production area is reserved exclusively for the fabrication of samples and prototypes.

## *Zero defect goal – our driving force in all sectors*

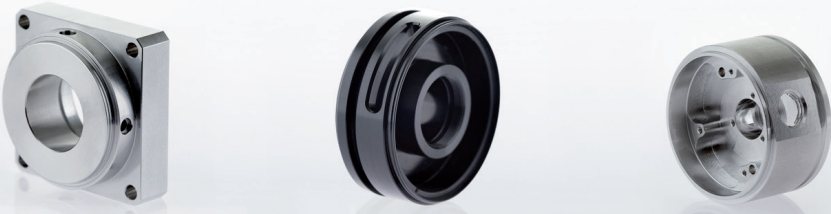

Our customers are at home in all market segments where high quality, flexibility and efficiency make up the basis for success. These are, for example, traffic engineering, process measurement and control engineering, mechanical engineering, building services as well as applications in the area of optical and medical equipment.

## ■ *Our expertise – your satisfaction*

Our focus on select industrial sectors allows us to gain mastery of the typical materials and process steps. Furthermore, by applying modern setup methods and precise production planning we are able to achieve a very high level of efficiency.

The combination of potential synergies, from material purchasing to part family-optimized production and the pooling of expertise and technology, always works to your advantage.

## *Facts and figures*

- Founded as a family business in 1903, 250 employees today
- 11,000 sqm of manufacturing and logistics area
- Processing options:
  - $\varnothing$  6 mm to  $\varnothing$  120 mm in single and multi-spindle automatic lathes as well as grinding machines
  - Use of advanced cleaning technology
  - Processing of typical materials (up to 3500 t/year)  
Aluminium alloys: 2007; 2011; 4032; 5083; 6012; 6023; 6026; 6060; 6064A; 6065; 6082; 7075; and many others on request  
Copper alloys: all standard alloys on request
- Certificates: ISO/TS 16949:2009; ISO 9001:2008 and ISO 14001:2004

## ■ *Our service around the clock*

Our strength lies not only in our mastery of the materials and machining processes.

We live quality – from the first contact with the customer, to the consulting provided by experienced industry professionals, to demand-oriented logistics – around the clock, around the world.

Certified, flexible procedures and processes are the basis for the highest level of quality and satisfaction.

Creating custom solutions for your needs is what we do best.

*Challenge us.*
