

# Stainless steel in highest precision

---

Austenitic and austenitic-ferritic stainless steels

# Stainless steel in highest precision and flexibility

## *Precision machining in large or small series*

We, as a technology leader in the area of flexible series production, employ the most modern, state-of-the-art machines to meet your needs.

A special production area is reserved exclusively for the fabrication of samples and prototypes.

## *At home in industry and medicine*

Specialized as we are in the industrial sectors of process measurement and control technology as well as optics and medical technology, we speak your language.

## ■ *Our expertise – your satisfaction*

Our focus on select industrial sectors allows us to gain mastery of the typical materials and process steps. Furthermore, by applying modern setup methods and precise production planning we are able to achieve a very high level of efficiency.

The combination of potential synergies, from material purchasing to part family-optimized production and the pooling of expertise and technology, always works to your advantage.

## **■** *Facts and figures*

- Founded as a family business in 1903, 250 employees today
- 11,000 sqm of manufacturing and logistics area
- Processing options:
  - $\varnothing$  6 mm to  $\varnothing$  120 mm in single and multi-spindle automatic lathes as well as grinding machines
  - Use of advanced cleaning technology
  - Processing of typical materials (up to 1000 t/year)  
1.4301 1.4404 1.4539 1.4462  
1.4305 1.4435 1.4571 (and other alloys on request)
- Certificates: ISO/TS 16949:2009; ISO 9001:2008 and ISO 14001:2004
- Authorized to restamp materials according to AD-2000 HPO

## ■ *Our service around the clock*

Our strength lies not only in our mastery of the materials and machining processes.

We live quality – from the first contact with the customer, to the consulting provided by experienced industry professionals, to demand-oriented logistics – around the clock, around the world. Certified, flexible procedures and processes are the basis for the highest level of quality and satisfaction.

Creating custom solutions for your needs is what we do best.

*Challenge us.*
